

VACUUM INLET

Made from durable ABS, the vacuum inlet allows a pool vacuum hose to be connected directly to the filtration circuit. It simplifies pool maintenance by providing efficient suction of debris from the bottom of the pool. Easy to install, it is ideal for residential and semi-commercial swimming pools.

Model	A	B	C	D	E	F	G
PA00301-C	118,9	2"	50	54,5	56,65	66,55	9,9

Features

Connection	Ø 50 mm (solvent-weld)
Recommended flow rate	5 to 8 m³/h
Closing cap	Supplied to secure the opening when not in use
Installation	Vertical wall, mid-height - suitable for concrete pools
Resistance	UV, chlorine and pool treatment chemicals resistant
